YASKAWA

Ladder Editor

KEY BENEFITS

• Enhanced cross reference function

OVERVIEW

Ladder software is used to graphically display ladder programs with the concurrent I/O function as a signal connection diagram, or to edit ladder programs easily.

The robot controller's concurrent I/O function processes I/O related control independently from the manipulator, and in parallel with the manipulator operation.

Menu

Tool bar

"Ladder editing" display

"Ladder preview" display

Mnemonic Code

```
STR-NOT   #70013
STR-NOT   #70062
CNT       M256, M466
OR        #70096
OUT       #70104
. . . . . .
```
